

2015 MRC - Update

N1103.2.3 Building Cavities (Mandatory)

Building framing cavities shall not be used as ducts or plenums.

This section will not be enforced due to a potential conflict with PA 230. The “cost-effective” provision (125.1504 Sec. 4(3)(f)) is in question and a future rule change is expected.

Please refer to Section M1601 for Duct Construction requirements.
